

Work Guarantee Waiver Release

The mixing of alloys (lead and lead free) can be very uncertain with respect to quality and reliability.

BEST guarantees 100% acceptance of all contracted service work. Any product found to be defective resulting directly from the contract service work performed by BEST can be returned. We will either attempt to correct the defect at no cost or return the product to the customer and provide a credit.

We will certainly make every effort to work on your project successfully. However if you chose to mix alloys on this project we ask that you sign this waiver, as we can not guarantee the work performed.
