

RE: Export Compliance Inquiry

We are in receipt of your communication concerning compliance with the U.S. export regulations – namely, the International Traffic in Arms Regulations (ITAR) and the Export Administration Regulations (EAR).

BEST has developed and implemented a comprehensive Export Management and Compliance Program (EMCP) as is part of our integrated quality system. This program addresses our compliance to these regulations. We have established and implemented this program, as well as the supporting policies and procedures, to assure our compliance with the regulations.

As required by Part 122 of the ITAR, BEST is registered with the U.S. Department of State, Directorate of Defense Trade Controls (DDTC), having an expiration date of 09/30/2019.

Compliance to the ITAR and EAR are high priorities for BEST. We trust that this effectively answers any questions you may have concerning our system of compliance to the regulations.

Please contact me if you have questions or need further information.

Sincerely,

Dan Patten
